

Neurology Grand Rounds

“UPDATE ON THE PATHOPHYSIOLOGY OF STROKE DUE TO
LARGE VESSEL OCCLUSION”

Learning Objectives:

1. Understand the clinical burden of ischemic stroke due to large vessel occlusion
2. Explain the pathophysiological concept of brain ischemic penumbra and core applied to modern reperfusion therapies
3. Identify the clinical phenotypes of fast and slow progression of large vessel occlusion stroke

Dr. Rocha’s clinical and research interests focus on the management, diagnosis and prevention of acute stroke. The overarching goal of his research is to define the pathophysiological mechanisms of individual tolerance to different stroke subtypes. These findings will be used to identify targets for novel therapies to improve patient outcomes after stroke.

FRIDAY, October 16th, 2020 ■ 12PM
