

Neurology Grand Rounds

“NEUROLOGY IN MUSIC AND MUSICIANS”

Learning Objectives:

1. Examine how the nervous system makes music
2. Discuss music and abnormal sensory perception
3. Examine several historical musicians that have suffered from neurological disorders and discuss how their disease might have influenced their music

Dr. Maha Alattar completed her medical school training at the University of Tennessee, residency training at Georgetown University Hospital and sleep medicine fellowship at the Cleveland Clinic Foundation.

She has a special interest in music and the brain. She studied music during college and continues to play the piano. She has also completed a book on music and the brain and looks forward to publishing it.

FRIDAY, February 12, 2021 ■ 12PM
